DETAILED ACTION

Response to Amendment

1. This action is responsive to the Amendments filed 3 November 2006. Claims 21-40 are pending. Claim 21 is amended. Claims 1-20 are cancelled.

Allowable Subject Matter

2. Claims 21-40 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 21-37 are allowable over the prior art because a method of automatic adjustment of devices having setting elements, comprising the steps of: modifying the first reference setting of the setting elements, and measuring the characteristic curve again at predefined measurement points for a configuration of the setting elements, calculating gradient functions of the characteristic curve, calculating new settings of the setting elements by minimizing an error function by using measured values and the gradient functions and setting the setting elements to the calculated values to adjust the devices, and carrying out the adjustment again is not found, taught or suggested in the prior art of record. is not found, taught or suggested in the prior art of record.

Claim 38 is allowable over the prior art because an arrangement having a processor set up for automatic adjustment of devices having setting elements, comprising: modifying the first reference setting of the setting elements, and measuring the characteristic curve again at predefined measurement points for a configuration of

the setting elements, calculating gradient functions of the characteristic curve, calculating new settings of the setting elements by minimizing an error function by using previously calculated measured values and the gradient functions and setting the setting elements to the calculated values, and carrying out the adjustment again is not found, taught or suggested in the prior art of record.

Claim 39 is allowable over the prior art because a computer program product comprising a computer-readable storage medium on which a program is stored which after the program has been loaded into a memory of a computer, makes it possible for the computer to carry out a method for automatic adjustment of devices having setting elements, the adjustment comprising: modifying the first reference setting of the setting elements, and measuring the characteristic curve again at predefined measurement points for a configuration of the setting elements, calculating gradient functions of the characteristic curve, calculating new settings of the setting elements by minimizing an error function by using previously calculated measured values and the gradient functions and setting the setting elements to the calculated values, and carrying out the adjustment again is not found, taught or suggested in the prior art of record.

Claim 40 is allowable over the prior art because a computer-readable storage medium, on which a program is stored which, after the program has been loaded into a memory of a computer, makes it possible for the computer to carry out a method for automatic adjustment of devices having setting elements, the adjustment comprising: modifying the first reference setting of the setting elements, and measuring the characteristic curve again at predefined measurement points for a configuration of the

setting elements, calculating gradient functions of the characteristic curve, calculating new settings of the setting elements by minimizing an error function by using previously calculated measured values and the gradient functions and setting the setting elements to the calculated values, and carrying out the adjustment again is not found, taught or suggested in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
